SERIES 700

Assembly of 702 Series

- 1 Place the lid support on either right side panel or left side panel depending on location of "U" bracket on the housing. Using dimensions on installation diagram, fasten "U" bracket to side panel with two #6 sheet metal screws.
 - (Notice the 1%" dimension from center of hinge pin to pivot point of "U" bracket is critical.)
- Lay the lid support up against the under side of the lid so that the first screw hole is approximately 3 inches from back edge of lid. Fasten with 2 #6 sheet metal screws as before.

- Place bottom bracket so that top screw hole is 1 1/16" down from the top of back panel. Fasten with #6 sheet metal screw. Secure second screw as well.
- Open lid to approximately 90 degrees and place lid support against the under side of lid with cover bracket flat against this surface. Secure with two screws as before. The distance from the back edge of the lid to the first screw hole should be 3 inches.

NOTE: Assemblers and Servicemen

Lids may be locked open during installation of changer by applying
